

Suleiman Olayemi Mistura

Frontend Engineer | React • Next.js • TypeScript

Lagos, Nigeria | smistura706@gmail.com | [Github](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend engineer specializing in **React**, **Next.js**, and **TypeScript**, with experience building and shipping real-world web applications used by active users. Experienced in translating Figma designs into responsive interfaces, integrating **REST** and **real-time APIs**, and building maintainable frontend architecture with modern state management and data-fetching tools. Experienced working in cross-functional teams and taking ownership of frontend features from implementation through delivery.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, HTML, CSS
 - **Frontend:** React, Next.js, Tailwind CSS, Vite, React Query, Zustand, Framer Motion
 - **Testing:** Vitest, React Testing Library, Playwright
 - **Backend & Data:** Supabase, PostgreSQL, SQLite, REST APIs
 - **Tools:** Git, GitHub, Netlify, Notion, Slack
-

PROFESSIONAL EXPERIENCE

Frontend Engineer (Intern)

Remote

Flaretag

Apr 2026–Jun 2026

- Led the frontend team on FlareTag, a badge generation platform built by a cross-functional team, coordinating progress and communication with other teams working on the product.
- Built and owned the custom badge-template system, implementing dynamic template customization, preview, and generation flows for event organizers.
- Reached 60+ active users by the end of the internship, with interns and mentors using the platform to generate and share finalist badges across social media.

Frontend Engineer

Remote

Emerj—HNG Connect

Dec 2025 – Feb 2026

- Continued frontend development on HNG Connect, a talent-pool and recruitment platform connecting companies with HNG finalists and mentors, during Emerj's post-internship incubation phase.
- Built frontend features and UI for the platform using Next.js, TypeScript, and Tailwind CSS.

Frontend Engineer (Intern)

Remote

HNG Tech—HNG Internship

Oct 2025–Dec 2025

- Completed the multi-stage HNG Internship program, graduating among 450+ participants from an initial cohort of 12,000+.
- Built multiple individual frontend projects using React, Next.js, Supabase, and Convex.
- Implemented CRUD operations and API integrations across several task-based applications
- Converted Figma designs into responsive, production-ready user interfaces.

- Strengthened skills in component architecture, state management, and frontend performance through task reviews and iterative development workflows.
-

PROJECTS

Fateround | fateround.com

- Frontend engineer on a real-time multiplayer party game app with 20+ game modes, built with Next.js, React, Supabase (Postgres + Realtime), and TypeScript.
- Built and shipped multiple real-time game modes and iterated on gameplay UX based on direct user feedback.
- Wrote tests using Vitest, React Testing Library, and Playwright to cover core functionality.
- Contributed to a live product with close to 100 active users, currently in active development.

PREP | prep-eta-seven.vercel.app

- Built a quiz/exam-practice web app (React, TypeScript, Vite, Tailwind CSS, Supabase) featuring CSV-based quiz creation, a visual quiz builder, and progress autosave.
- Wrote tests using Vitest and React Testing Library to cover core functionality.
- Released the first version to real students, with approximately 15 coursemates using it for CBT exam preparation.

Pike | github.com/Truella/pike

- Designed and built a personal automation platform with independent modules for job discovery, technical interview study tracking, and content generation, each with its own scheduled background workflow (GitHub Actions), Supabase database, and dashboard interface.
 - Implemented Supabase Auth with row-level security across all user-owned data and integrated three external APIs (LinkedIn, Groq, and Telegram) for automated content publishing and notifications.
 - Built a token-driven, runtime-switchable theming system supporting four distinct visual identities across a shared component library, using Tailwind CSS v4's CSS-first configuration.
-

EDUCATION

BSc. in Computer Science

2025–Till present

Lagos State University, Ojo, Lagos.

National Diploma in Electronics and Computer Engineering

2022 – 2024

Lagos State University, Ojo, Lagos.

CERTIFICATES

- Meta Front-End Developer Specialization – Coursera
- Programming with JavaScript – Meta / Coursera
- Getting Started with Git and GitHub – IBM / Coursera
